

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	6 July 2026
Team ID	
Project Name	Heart Disease Analysis with Tableau
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⌚ 10 minutes to prepare
🕒 1 hour to collaborate
👥 2-8 people recommended

●

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

A

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

PROBLEM

How might we **How might we use interactive data visualization to identify heart disease risk factors and support better healthcare decisions?**

Key rules of brainstorming

To run a smooth and productive session

🗣️ Stay in topic.

💡 Encourage wild ideas.

🕒 Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Person 1

- How might we organize healthcare data for accurate analysis?
- How might we analyze patient demographics to understand disease patterns?
- How might we identify the major risk factors associated with heart disease?

Person 2

- How might we analyze lifestyle habits to identify high-risk individuals?
- How might we evaluate the relationship between physical activity and heart health?
- How might we measure the impact of smoking on heart disease?

Person 3

- How might we enable users to explore data through interactive filters?
- How might we simplify heart disease analysis using effective visualizations?
- How might we present complex healthcare data through interactive dashboards?

Person 4

- How might we compare different patient groups to reveal hidden trends?
- How might we highlight meaningful insights from heart disease data?
- How might we communicate analytical findings through data storytelling?

Person 5

- How might we promote preventive healthcare using analytical insights?
- How might we improve awareness of heart disease risk through interactive analytics?
- How might we support healthcare professionals in making data-driven decisions?

TIP
You can select a sticky note and hit the pinch gesture to zoom in to see drawing!

3 Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP
Ask customers to help to group notes to their needs to the driver, engineer, and customer support team as they enter your mural.

Group 1

- Analyze demographic factors (Age, Gender, Race)
- Study lifestyle risk factors (Smoking, Alcohol, Physical Activity)
- Identify high-risk patient groups

Group 2

- Develop interactive Tableau dashboards and stories
- Generate healthcare insights for better decision-making

Step-3: Idea Prioritization

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP
Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the user pointer holding the left key on the keyboard.

Importance
If each of these ideas could get done without any difficulty at all, which would have the most positive impact?

Feasibility
Regardless of their importance, which ideas are more feasible than others? (Cost, time, effort, complexity, etc.)

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

- Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

- Strategy blueprint**
Define the components of a new idea or strategy.
