

Project Design Phase

Problem – Solution Fit Template

Date	6 July 2026
Team ID	
Project Name	Heart Disease Analysis with Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Problem–Solution Fit Canvas 2.0 – Heart Disease Analysis

Purpose / Vision: Empower early detection and better understanding of heart disease through data-driven insights and interactive visual analytics.

Define CS, refine CC 1. CUSTOMER SEGMENT(S) CS - Patients at risk of heart disease (All age groups) - Healthcare Professionals (Doctors, Cardiologists) - Researchers & Data Analysts - Public Health Organizations - Students and Academics	6. CUSTOMER CONSTRAINTS CC - Lack of early detection leads to severe complications. - Complex medical data is hard to interpret. - Patients are unaware of their risk factors. - Time-consuming manual analysis of patient data. - Need for interactive and easy-to-understand insights.	5. AVAILABLE SOLUTIONS AS - Traditional medical tests and diagnosis. - Basic reports and spreadsheets. - Existing health apps (limited insights). - Data visualization tools (limited to experts). - Machine learning models (complex for non-technical users). Explore AS, differentiate
Focus J&P, tap into EC, understand RC 2. JOBS-TO-BE-DONE / PROBLEMS J&P - Identify heart disease risk early. - Understand key risk factors contributing to heart disease. - Analyze patient data and find patterns/trends. - Visualize data in a simple and interactive way. - Share insights for better decision-making.	9. PROBLEM ROOT CAUSE RC - Lack of awareness about heart disease risk factors. - Inability to analyze large datasets efficiently. - Medical data is complex and not easy to understand. - Lack of interactive visualization for non-technical users. - Delayed detection due to manual processes and interpretation.	7. BEHAVIOUR BE - Patients ignore early warning signs. - Prefer simple explanations over complex reports. - Doctors need quick and reliable insights. - Users interact more with visual and interactive dashboards. - Share reports and insights for better consultation. Focus on J&P, tap into BE, understand RC
Identify strong TR & EM 3. TRIGGERS TR - Family history of heart disease. - High blood pressure, diabetes, obesity. - Unhealthy lifestyle (smoking, poor diet, lack of exercise). - Regular health checkups and medical tests. 4. EMOTIONS: BEFORE / AFTER EM - Before: Anxiety, uncertainty, lack of awareness. - After: Relief, clarity, confidence in early action. - Satisfaction from understanding health better.	10. YOUR SOLUTION SL - An interactive Heart Disease Analysis platform. - Visual dashboards with KPIs, charts, and insights. - Easy-to-understand risk factor analysis. - Built using Tableau for visualization and Flask for a seamless web experience. - Helps users explore data and make informed decisions early.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE - Web application (accessible anywhere). - Shared dashboards and reports. - Embedded visualizations. 8.2 OFFLINE - Hospital consultations. - Health camps and awareness programs. - Printed reports and recommendations. Extend online & offline CH of BE
